

Code challenge documentation

1. The completed code challenge is uploaded to my GitHub repository (<https://github.com/loannisDogas/Projects.git>) in a folder named "tfs_cd "
2. In order to view the end result double click on the folder "tfs_cd", on the file "tfsCodeChallenge.html" right click "Copy link address" and paste the URL to <https://htmlpreview.github.io>

Notice: The requirement was that the banner won't be visible according to the schedule dates presented in the snippet (implemented as JSON file ("banner.json") as required). Since the dates provided in the snippet are from February, the banner will not be visible, but all other functionality required won't be also. In order to be able to see the banner functionality in the browser I kept it visible. With proper dates I would have made the banner removed after, expiration but now I just zeroed the time of offer. I didn't manipulate the snippet dates, to proper ones, because it might be considered as bad practice manipulating a provided code challenge to evaluate candidate.
